

UHF Antenna

For Digital Terrestrial broadcasting reception
For Home Use

U146 14 elements

Incarnate the best performance and easy setup of number one company in our industry!

U146

For ch.13~52
For horizontal / vertical polarization

For middle electric field

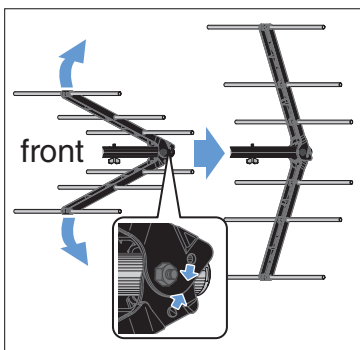

14 elements

Incarnate the actual gain of number one company in our industry

U146 has been espoused six reflectors and incarnated the actual gain of number one company in our industry due to optimization of reflectors and elements, adjustment low loss of the dipole.

Easy setup structure

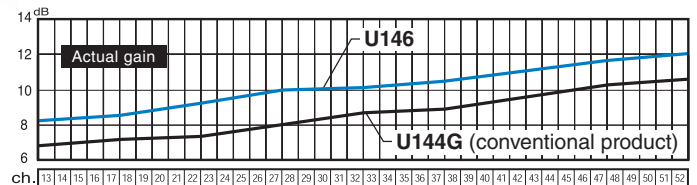

U146 has new structure six reflectors which can fix it just be opened to up down, And U146 can reduce working hours of structure due to the beam dipole of new design which espouses F-type connector.

► **Supportable till 48.6mm of antenna pole across**

Conformity antenna pole across is 22~48.6mm

Specification table

Item	U146
Reception channel	ch.13~52
Polarization	horizontal / vertical
Actual gain	8~12.4dB
VSWR	less than 2.5
Front-to-back ratio	18~28dB
Half-power angle	32~56°
Impedance	75Ω (F-type connector)
Conformity antenna pole	22~48.6mm
External dimensions	1030(L)*373(W)*544(H)mm
Weight	approximately 890g

Specifications and external design are subject to change for further improvements.
